users				
PK	id	bigint	not null	
unique	username	text	not null	
unique	username_lowercase	text	not null	Username_lowercase Username will be stored both in lowercase and a mix of
unique	email	text	not null	uppercase and lowercase or just lowercase. For example, bob and BoB, ANdrew and andrew or Andrew or ANdreW. G Eorge or g Eorge or g eorge. Necessary for when we need to tell users who want to register if the username is already taken or not because we have to converted to lowercase first then check database if the username is already taken. avatar - 0 if user doesn't have avatar and 1 if user does token - it will be sent by email for verification verified - user is verified or not, 1 for yes and 0 for no expiration - if the user doesn't verify his email in a certain amount of time, the user must resend email verification Type must be TEXT because it will check against current date.
